Subject: *Phase II Transformer PCB Investigation Work Plan* Final Submittal
Boeing Plant 2, Seattle/Tukwila, Washington
EPA ID No. WAD 00925 6819
RCRA Docket No. 1092-01-22-3008(h)

Dear Ms. Filutowski:

Please find enclosed ten (10) paper copies (each with a CD copy) of the final *Phase II Transformer PCB Investigation Work Plan*. Note that separate CD copies are being provided directly to Mr. Fujita and Mr. Helland.

This Plan covers the Upland portion of the Investigation, and we believe it is responsive to all comments received and discussed including through the Order Section 10.3 process. Sediment samples required for Phase II of the Transformer PCB Investigation were reported in October 2004 in conjunction with the Upriver (Area I) sediment characterization sampling activity. This Phase II work plan references that already-completed task.

As noted earlier, the data compiled during the decommissioning and removal of the transformer equipment by Seattle City Light is provided in Appendix D. A plan for the work associated with the storm water system components upgradient to the SCL Transformer Investigation area, which is being done as a source control matter, is being prepared separately.

We await your concurrence or any final comments on the enclosed final Work Plan so that we may continue progress on this important investigation. Please don't hesitate to contact me if you have any questions or comments.

Sincerely,

Will Ernst
Plant 2 Project Coordinator
